

**NEXT GENERATION  
SELF-GROUNDING SYSTEM**

**LIGHTENING HAPPENS**

**SUNMODO**®  
solar racking solutions

**A SOUND GROUND IN SECONDS**

If you're a professional installer,  
**SunModo's** got your rack!

**SunModo**, the company that took the solar racking industry by storm with EZ Roof Mounts and EZ SunBeam flat roof systems, proudly introduces its latest innovation:

A fuss-free, affordable Self-Grounding System unlike anything on the market today. Our secret: Built-in grounding pins in easy-to-use components for any panel and rail configuration.

We'll have you off the roof so fast you'll hit the ground running to your next installation.

# SUNMODO'S SELF-GROUNDING SYSTEM

*The Newest Industry Standard is Here!*

Professional solar installation just became easier and more secure. SunModo's self-grounding product line simplifies your solar installations with a complete line of solar mounting products.

We took feedback from professional installers to create a new standard in self-grounding that meets NEC 690.47 and UL 2703. Here's how it works:

## Self-Grounding Pins

Each product in our new system features self-grounding pins that pierce rail coatings to form a reliable, durable grounding connection as part of the natural installation process.

## Self-Grounding Rail Splices

Our splices with built-in grounding pins deliver a stronger rack and a solid bond between rails.

## Self-Grounding Lug

Our lug features self-grounding to the rail, ensuring proper grounding of the PV system.

## Self-Grounding Portrait Mid Clamps

Our self-grounding mid clamps have our own innovative "T" bolt locking assembly that makes positioning and torquing a breeze.

## Self-Grounding Landscape Mid Clamps

Our system conveniently handles landscape configuration to minimize roof time and parts required.

## Self-Grounding Landscape End Clamps

Our system easily converts standard rails to shared rails to allow landscape mounting of PV panels on E-W rails.

## ABOUT SUNMODO

We want to be the professional installer's first and only call for solar racking solutions, one hassle-free installation at a time. As a private and thriving U.S. company, SunModo spends every day finding ways to secure solar investments through high quality, low cost, always reliable racking systems. Not surprisingly, our team already has racked up 14 patents and more are on the way.

Try our new self-grounding system or any of our flat, pitched or ground mount racking systems. Once you do, we'll be forever attached!
