

# INSTALLATION MADE EZ & EZR!

EZ

EZR

SunModo's best-selling EZ Roof Mount is the industry standard for PV system mounting on any composite shingle roof.

Now, SunModo introduces a smaller footprint, EZR Roof Mount flashing, where truss anchoring can be assured, embossed design minimizes bending, and only one tool is needed.

## The EZ & EZR Advantage

- ✓ Leak-proof design protects sealing points from elements.
- ✓ ICC Certified for both rafter and decking solution.
- ✓ Exceptional resistance to corrosion and wear.
- ✓ A wide variety of L-feet and standoffs available.
- ✓ **Surprisingly easy to install!**

# Key Features of EZ and EZR

## MODEL

Raised teardrop design diverts water from the roof penetration.

360-degree L foot positioning, serrated L foot on both sides for rail mounting.

A wide variety of L-feet and standoffs available.

Versatile mounting option includes direct-to-decking for easy installation.

Stamped emboss features stiffen the flashing to minimize bending.

Only one tool is needed.

## Technical Data
