## **SunModo Response to COVID-19**

SunModo has been working hard to adapt to the rapidly changing conditions we are all facing as a result of the ongoing situation with the Coronavirus. Aside from the safety and well-being of our team members, customers, and communities, our top priority is to continue supporting the needs of the Solar community.

Beginning in March we implemented a carefully developed plan that was focused on maintaining a high level of service to our customers while also minimizing opportunities for transmission of the virus. In support of this goal, the majority of our office staff continues to work remotely while our full warehouse staff has continued to operate at full capacity while observing the recommended Covid-19 protocols.

We take great pride in having not missed a beat in any facet of our operations. Our Sales Team has conducted countless webinars and Zoom calls. Our Engineering Team has continued to provide detailed technical support to customers while also finalizing the details for the launch of three completely new families of products; and our Operations team has shipped products at a record rate. All of this has been accomplished while maintaining a high level of Covid-19 precautions.

We constantly monitor the evolving situation closely all around the country and maintain multiple contingencies to insure our continued safe operation. We intend to continue doing all we can to make sure that our proud and resilient Solar community emerges from this situation stronger than ever. If you have any questions or if there is anything we can do to support you during this time, please contact your SunModo representative or our main office at 360-844-0048.
